Safety

Operation
Before operating game, read this manual. Failure to properly install and operate this game could result in malfunction or accident. Operate the game in accordance with the manual.

Transporting
The cabinet is very heavy. Because the monitor is high, the cabinet is also very top-heavy. Use appropriate care when moving or transporting cabinet. It contains fragile glass and electronic components. Avoid rough handling.

Handling Components
Many components are extremely sensitive to handling, environmental and Electrostatic Discharge (ESD) events—especially the computer. Do not handle it roughly. Before servicing, call your distributor and inquire about the PC warranty. Use proper ESD procedures when servicing. Protect components from harmful environmental conditions, such as extreme temperatures, excessive moisture or other damaging effects.

Disconnect Power
Always turn the power off and unplug the unit before servicing or making adjustments unless otherwise instructed. Installing or repairing components while power is on can damage the components and void the warranty.

Grounding
Avoid electrical shock. Do not plug in AC power until you have inspected and properly grounded the unit. Only plug into a grounded, three-wire outlet. Do not use a “cheater” plug or cut off the ground pin on the line cord.

Electrical Shocks
There is no isolation transformer in the cabinet. Disconnect AC power before servicing. However, be aware that lethal voltages can remain in the electronic components even when AC power is disconnected. Use extreme caution when servicing. Verify that there is a working ground connection. If the unit sustains water damage, cease using it immediately and unplug AC power.

Monitor
The monitor contains no user serviceable parts. Do not attempt to service the monitor.

Power Cord
If the power cord is damaged or lost, replace it with an identical cord as supplied by the manufacturer or an authorized service agent.

Surge Suppressor
It is recommended that you plug your game’s power cord into a surge suppressor to help protect from power surges that may damage sensitive electronic components.
Water and Other Liquid Sources
Do not install game near sprinkler or other water jet sources. Do not use water jet to clean game. Keep minimum clearance behind game and wall for proper ventilation but also prevent access of liquid from spills and sprays from entering ventilation holes.

Connectors
When servicing machine, ensure all connectors mate properly. If connectors do not slip in easily, do not force them. Connectors are often keyed and only connect one way. Check for correct orientation.

Computer
The computer contains sensitive components, including a hard drive. Do not handle it roughly. Call your distributor before servicing its internal components. Ask about warranty information as it relates to the PC. Cycle AC power on or off with the cabinet power switch. A dongle has been inserted into one of the USB ports. This is required for game play. Do not remove the dongle except for troubleshooting purposes.

Tempered Glass Warning
When handling the LCD display glass cover take special care and set the glass down softly on a flat surface free of debris. The edge of the glass is sensitive to hard impact. Shattered glass from the monitor can travel long distances and cause bodily injury. Use proper procedures when handling broken materials.

Hazard to Epileptics
A small portion of the population has an epileptic condition that may cause seizures. Affected persons experience seizure while watching some television pictures or playing certain video games. People who have not had seizures may still have an undetected epileptic condition. If anyone in your family has experienced epilepsy symptoms (seizures or loss of awareness), consult your physical before using video games. While children play video games, a parent should observe. Be alert to the following symptoms: dizziness, altered vision, eye or muscle twitching, involuntary movements, loss of awareness, disorientation or convulsions. If you or your child experiences these symptoms, discontinue use immediately and consult your physician.

Manual
Keep this manual available and ready for use. If the game fails to function properly, turn off the machine and unplug the AC line cord. Contact your local distributor. Your warranty, when applicable, lasts 60 days from your purchase date. You may not reproduce this document or any of its contents without written authorization from Raw Thrills, Inc.

Specifications
For reasons such as performance, this product’s specifications may change without notice. Federal patent, copyright and other intellectual property laws protect the content, devices and design of the game and its equipment.
Product Specifications

Electrical Power
United States, International and Japan
Operating AC Current: 5/2.5 AMPS
Voltage: 115/230~VAC 50/60Hz

Temperature
50° F to 104° F
(10° C to 40° C)

Humidity
Must not exceed 95% relative humidity

Dimensions
Cabinet:
Height: 79.17”
Depth: 32.80”
Width: 45.19”

Bike:
Height: 39.34”
Depth: 68.42”
Width: 35.43”

Fully assembled on location:
Height: 98.25”
Depth: 84.625”
Width: 45.19”
Approximate weight: 660lbs

Fuse Replacement Guide

NOTE: FOR CONTINUED PROTECTION AGAINST
FIRE AND ELECTRICAL DAMAGE, USE ONLY
SPECIFIED FUSE TYPE AND VALUE.

Please see unit for specified fuse labeling. Abbreviations:

| 5A 250V | 5A, 250VAC Fast Acting 3AG Fuse | Littlefuse 031205.MXP (or equivalent) |
Setup

Unpack Materials

1. Place the shipping crate(s) on a flat, stable surface.
2. Cut the banding straps and remove the cardboard lids.
3. Lift off the large cardboard containers surrounding the cabinet assembly and remove any shipping cleats.
4. Remove the coin door key from the coin return slot.
5. Open the top coin door.
6. Locate the keys for the back door and the cash box door.
7. Open the cash box door and remove the cash box.
8. Check for shipping damage to the following:
   - Marquee and monitor
   - Cabinet decals
9. Check the AC line cord for visible signs of damage.
   
   Pay particular attention to the plug and line cord insulation.
Cabinet Assembly

**Note:** 2 people are required, and ladders are recommended. Marquee assembly is **top heavy and can tip over!**

1. Place cabinet in desired floor location. Remove upper back door and carefully place such that it will not fall over or be damaged. Setup ladders next to the cabinet for marquee installation.
2. Locate the marquee assembly as well as the following hardware:
   a. (5) black tamper proof Torx machine screws, ¼ - 20 thread, 1-1/2” long
   b. (5) ¼” black split lock washers
   c. (5) ¼” black flat washers
3. Using a T-27 bit, securely mount the marquee assembly atop the cabinet as shown in the assembly setup diagram, avoiding any pinching/crushing of the wire harness which should pass through the access hole. Connect marquee harness to cabinet harness.
4. Connect internal wire harness from inside the main cabinet to bike assembly manually.
5. Locate the bike assembly as well as the following hardware:
   a. (4) black tamper proof Torx machine screws, ¼ - 20 thread, 1-1/2” long
   b. (4) ¼” black split lock washers
   c. (4) ¼” black flat washers
6. Push bike assembly into rectangular opening and using a T-27 bit, secure the bike assembly to the cabinet as shown in the assembly setup diagram, avoiding any pinching/crushing of the wire harness which should pass through the access hole.
Card Reader Installation and Setup

Due to the rising popularity of aftermarket debit card systems for cashless or coinless operation of amusement machines (i.e. Embed, Intercard, Semnox), this Super Bikes 3 cabinet is equipped with UCL compatible harnessing to ensure that the installation process is easier and less prone to miswiring.

It is recommended that the card reader be mounted to the coin door, using either the provided UCL connector.

UCL, or Universal Card Link, is a debit card standard established by the American Amusement Machine Association. Visit [https://coin-op.org/standardization/](https://coin-op.org/standardization/) for the latest UCL standard and manual information.

The UCL connections on the game use pins 1, 2, 6, 8, and 9. The other pins are unused. Each UCL connector can supply up to 1A at 12VDC.
Check Electrical Settings
1. Verify the voltage in the nearest AC outlet.
2. Verify the AC outlet ground connection is present and working.

Startup Game
1. Plug the line cord into an AC outlet.
2. Turn the main cabinet power switch on.
3. Verify the game and all components are operating normally. See Basic Functional Test on Initial Power Up in the Diagnostics and Adjustments section for the recommended procedure.
Diagnostic and Adjustments

The Service Button Panel has four buttons, three of which can navigate the menu system.

The control panel buttons and joysticks/guns can also advance through test menu screens.

### Navigating the Test Menu

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>TEST (Not in Test Menu)</td>
<td>Enters Test Menu</td>
</tr>
<tr>
<td>TEST (In Test Menu)</td>
<td>Selects Highlighted Option</td>
</tr>
<tr>
<td>SERVICE (On Main Menu)</td>

<td>Move Up</td>
</tr>
<tr>
<td>VOLUME DOWN</td>
<td>Move Down</td>
</tr>
<tr>
<td>Start Buttons</td>
<td>Selects Highlighted Option</td>
</tr>
</tbody>
</table>

An on-screen message acknowledges changes or when you exit a selection without making a change.
Basic Functional Test on Initial Power Up

1. Enter the Input Test and verify all switch inputs are working.
2. Enter the Monitor Test and verify the monitor is working properly.
3. Enter the Sound Test and verify the audio works and is not distorted.
4. Enter the Light Test and verify that all the lights are working properly.
5. Enter the Coin Meter Test and verify the coin meter is working properly.
6. Enter the Watchdog Test and verify the game reboots.
7. Upon a successful reboot, you are ready to adjust pricing, volume and other functions.
Test Menus

Main Menu
Choose from all available operator settings and menus here. You can use the test menu bracket and volume buttons to navigate. The View, Tunes, and Start buttons as well as the brake are also available to use for easier navigation through these menus.

Diagnostics

This menu allows all game functions to be verified or diagnosed. You can improve collections by periodically verifying proper game function and operation. This includes periodic Hard Drive checks to verify that software has not been corrupted or reporting an error.

- **Input Test**: Test input hardware such as switches.
- **Video Test**: Cycle through full screen colors on the monitor.
- **Audio Test**: Test audio using 100HZ and 1000HZ test.
- **Cabinet Lights Test**: Tests all LED cabinet lighting together and individually.
- **Blower Test**: Test the blower motor.
- **Meter Test**: Test the functionality of the mechanical coin meter inside the cabinet.
- **QR Test**: Test view QR codes to send info to Raw Thrills.
- **Ticket Test**: Test the functionality of the ticket mech.
- **Camera Test**: Test the functionality of the camera.
- **Watchdog Test**: Test the functionality of the watchdog reset.
Pricing Adjustments Cash
Set pricing adjustments. There are three options to choose from: cash, token, and swipes.

<table>
<thead>
<tr>
<th>PRICING ADJUSTMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>(CASH)</td>
</tr>
<tr>
<td>FREE PLAY</td>
</tr>
<tr>
<td>CURRENCY INPUT</td>
</tr>
<tr>
<td>CURRENCY TYPE</td>
</tr>
<tr>
<td>COIN VALUE</td>
</tr>
<tr>
<td>COINS TO PLAY</td>
</tr>
<tr>
<td>MAX CREDITS</td>
</tr>
<tr>
<td>E-TICKET MODE</td>
</tr>
</tbody>
</table>

- **Free Play**: Turn free play mode on or off (default off).
- **Currency Input**: Change the currency input. Choose between, cash, tokens, and swipes.
- **Currency Type**: Change the currency type.
- **Coin Value**: Change the money value of the coin.
- **Coins to Play**: Adjust the amount of coins per credit.
- **Max Credits**: Adjust the maximum number of credits.
- **E-Ticket Mode**: Turn E-Tickets on or off (default off). When on adjust ticket payout for 1\textsuperscript{st} through 4\textsuperscript{th} place finishers.
Pricing Adjustments Tokens
Set pricing adjustments. There are three options to choose from: cash, token, and swipes.

- **Free Play**: Turn free play mode on or off (default off).
- **Currency Input**: Change the currency input. Choose between, cash, tokens, and swipes.
- **Currency Type**: Change the currency type.
- **Coin Value**: Change the money value of the token.
- **Coins to Play**: Adjust the amount of tokens per credit.
- **Max Credits**: Adjust the maximum number of credits.
- **E-Ticket Mode**: Turn E-Tickets on or off (default off). When on adjust ticket payout for 1st through 4th place finishers.
Pricing Adjustments Swipes
Set pricing adjustments. There are three options to choose from: cash, token, and swipes.

- **Free Play**: Turn free play mode on or off (default off).
- **Currency Input**: Change the currency input. Choose between, cash, tokens, and swipes.
- **Currency Type**: Change the currency type.
- **Swipe Value**: Change the money value of the swipe.
- **Swipes to Play**: Adjust the amount of swipes per credit.
- **Max Credits**: Adjust the maximum number of credits.
- **E-Ticket Mode**: Turn E-Tickets on or off (default off). When on adjust ticket payout for 1st through 4th place finishers.
Game Settings
This menu allows for customization of game settings.

GAME SETTINGS

- **Autoplay Enabled**: Turn on or off (default off). When on games will play automatically.
- **Free Race for H2H Win**: Turn on or off (default off). When on the winner of a head to head race against another player will receive a free race.
- **Name Entry/High Scores**: Turn on or off (default on). When on players may enter their name and show high scores after finishing a race.
- **QR Codes**: Turn on or off (default off). When on the venue and location must be set. This allows players to scan a QR code after race to share their high scores on social media sites.
- **Upgrades**: Turn on or off (default on). When on this allows the players to purchase upgrades before the start of a race.
- **Females**: Enable/disable images of women anywhere in the game.
System Settings
This menu allows for customization of various system settings.

SYSTEM SETTINGS

NETWORK SETTINGS
PHOTO CAMERA
LANGUAGE
LED BRIGHTNESS
CABINET COLOR
DATE & TIME

EXIT

- **Network Settings**: Turn on for linked games (leave off if operating a single game).
- **Photo Camera**: Change settings for photo camera (on or off).
- **Language**: Set in game language.
- **LED Brightness**: Adjust the brightness of the cabinet LED lights.
- **Cabinet Color**: Specify the color of the cabinet plastics.
- **Date & Time**: Use to set the date and time.
Audits
Audit screen help assess game performance, find intermittent problems, decide whether to adjust game difficulty and help maximize game earnings.

There are no special menu options for this test menu entry.
Resets
Resets menu allows for the resetting of various machine settings and audits.

**RESETS MENU**

- **RESET CREDITS**
- **RESET TICKETS**
- **RESET PRICING ADJUSTMENTS**
- **RESET GAME ADJUSTMENTS**
- **RESET LEADERBOARDS**
- **RESET GAME AUDITS**
- **RESET SYSTEM AUDITS**
- **RESET COIN AUDITS**
- **RESET ALL AUDITS**
- **FACTORY RESTORE**

**EXIT**

- **Reset Credits**: Reset credits to zero (0).
- **Reset Tickets**: Clears out all tickets owed on the game.
- **Reset Pricing Adjustments**: Reset all pricing settings to default.
- **Reset Game Adjustments**: Reset all game settings to default.
- **Reset Leaderboards**: Reset all high score tables.
- **Reset Game Audits**: Reset all game related audits.
- **Reset System Audits**: Reset all system audits.
- **Reset Coin Audits**: Reset all coin audits.
- **Reset All Audits**: Reset all audits.
- **Factory Restore**: Restore game to default factory settings.
Volume
Volume adjustments.

- **Game Volume**: Adjust the volume during gameplay (from 0 to 30).
- **Attract Volume**: Adjust the volume during the attract mode sequences (from 0 to 30).
- **Credit Volume**: Adjust the volume of the credit chime (from 0 to 30).
- **Minimum Volume**: Adjust the minimum volume (from 0 to 30).
Calibration
Calibration of bike hardware.

There are no special menu options for this test menu entry. Follow on screen prompts to calibrate bike hardware.
Utilities
Miscellaneous operator tools.

UTILITIES

COPY AUDITS, LOGS, & SCORES TO USB

• View Engine Log: Examine engine messages.
**System Information**
This screen allows you to see various information about the software and hardware.

- Serial Number
- Software Revision
- Build Date
- RIO PCB
- RIO Firmware
- Dongle Version
- Cabinet Type
- Game Template

There are no special menu options for this test menu entry.
Choosing the Right Pricing Adjustments for Your Location

Card Swipe Locations
- Make Sure Your Game is Set to **Swipes Mode**:
  1. Hold the Test Button for 2 seconds to enter the Test Menu.
  2. Select “Pricing Adjustments” from the menu.
  3. Select “Currency Input” from the menu.
  4. Select “Card Swipes” from the menu.
  5. Exit out of “Currency Input” menu.
  6. While back in “Pricing Adjustments” menu, set “Swipe Value” to the currency equivalent of your swipe. **THIS SETTING IS EXTREMELY IMPORTANT** (Example: If the card swipe is worth $1.50 in your card system, set the swipe value to $1.50 as well).

Coin and Token Locations
- Make Sure Your **Pricing & Coin Value** are Correct:
  1. Hold the Test Button for 2 seconds to enter the Test Menu.
  2. Select “Pricing Adjustments” from the menu.
  3. Select “Currency Input” from the menu.
  4. Select “Cash” or “Tokens” from the menu.
  5. Exit out of “Currency Input” menu.
  6. While back in “Pricing Adjustments” menu
     a. Select “Coins to Play” and set the desired amount of coins per game.
     b. After setting the coins per play, set “Coin Value” to the currency equivalent of your coin. **THIS SETTING IS EXTREMELY IMPORTANT** (Example: If your coin is worth $0.25, set “Coin Value” to $0.25 as well).
PC Hardware

Your Super Bikes uses a HP Elitedesk 705 G3 MT computer with a GeForce GTX 1050 graphics card. Listed below are the recommended BIOS settings for the computer.

NOTE 1
WARNING: DO NOT ENTER THE BIOS SETTINGS MENU! Modifying the BIOS settings will cause your game to stop functioning. In order to boot, new security features verify the BIOS settings against factory settings, including timestamp.

NOTE 2
In the event your video card needs to be replaced, any brand of GeForce GTX 1050 will work.
PC Hard Drive Recovery

Symptoms requiring a PC hard drive recovery include:

- File test reports bad or missing files.
- Game fails to finish loading during setup.
- After resetting the AC power, an error is reported.
- Erratic Game or Attract Mode behavior.

The only way to repair corrupt files is to reinstall the software as described below:

**Computer**

The computer contains sensitive components. Do not handle roughly. Call your distributor before servicing its internal components. Ask about warranty information as it relates to the PC.

Do *not* use the PC on/off switch. Turn AC power on or off with the cabinet power switch.

Steps to Re-Install the software:

(NO DVD Restoration. USB Thumb Drive is used on the HP Elitedesk 705 G3 MT)

1. With game and PC on, verify that the RIO board has power. If not, see Troubleshooting.
2. Open the coin door.
3. Insert the recovery USB thumb drive (included in your game) into the USB port on the Test button bracket inside the coin door.
4. Open lower back door of cabinet and plug in USB keyboard to PC.
5. Turn cabinet power switch to OFF. Wait 30 seconds.
6. Turn cabinet power switch to ON, and **HOLD** F9 on the keyboard until the Boot Menu screen appears.
7. Use the Up and Down arrow keys to highlight “Legacy – JetFlash Mass Storage Device” and press enter.
8. Follow on screen instructions to begin recovery.
9. If recovery does not begin, check to ensure USB Drive is inserted correctly and is not damaged.
10. Initial software loading may take several minutes. Check progress periodically. **Do not interrupt power or reset the game during recovery.**
11. When software has been loaded, a message indicates that restore is complete. When instructed to remove USB Drive, wait 15 seconds to remove the drive from the PC.
12. Turn cabinet power switch off and then turn the cabinet on again. Your game will now be restored.
# Troubleshooting

Warning: Review the Safety section before making any adjustments to the game.
